

A man in a dark jacket and brown pants, carrying a red bucket, and a young child in a purple shirt and blue pants, both walking away from the camera on a grassy hillside. The background shows a vast, hilly landscape under a clear blue sky. The title 'Heart & Soil' is written in a stylized, yellow and red font across the upper part of the image.

Heart & Soil

A family film making a compelling claim for sustainable agriculture.

“*Heart & Soil*” is a lively and charming family documentary that clips along to the pace of barefoot children and happy livestock. It inspires people to regain a connection to their food source, dig in or support the efforts of those that do to help cut down on the fossil fuels used for corporate supplied foods across the world and help sustain our personal and planetary health.
